2007 NIMS IMPLEMENTATION WORKSHOPS

The NIMS Integration Center (NIC) is holding a series of three-day, discipline-specific NIMS Implementation Workshops.

PURPOSE

The NIC is constantly looking for ways to improve our ability to provide you with the right tools to assist you in implementing NIMS. Basically, this is an opportunity for you to help us help you – better.

To help us meet that important objective, we are conducting these NIMS Implementation Workshops where we will discuss NIMS implementation within your organization and capture lessons learned and best practices. Additionally, there may be opportunities to provide input on NIC projects such as new training course materials, new policies, etc. during the workshops.

As you all know, the successful implementation of NIMS depends on the participation and integration of all members of the emergency response community who have a role in preparing for, responding to, and recovering from an incident – regardless of its size, complexity or cause.

VIRTUALLY FREE

For all non-Federal employee participants, the cost of a 21-day advance airfare is reimbursed through the Emergency Management Institute's stipend program. There is no charge for on-campus lodging or FEMA-supplied transportation from and to the airport. The only cost is your meal card.

Space is limited. So contact us on or before the due date as indicated below. Upon selection, you will be e-mailed information on how the registration process.

WHAT'S NEXT?

If you are interested in attending a workshop, find your discipline (listed on page 2) and send an e-mail to the PRIMARY CONTACT PERSON indicating your interest on or before the due date indicated in the listing.

Please include the following information in your response e-mail:

Your Name:

Your Title:

Your Organization Name:

Workshop Title:
